How does language change work for app

i18n(localization module)

App.js

Vuex

Variety components
Get their text from vuex

changeLanguageAction()
invoking language change process

How does language rendering country flags icons or i118n dependency work

App.js

If array is not empty it will rend flags
else you will see only english flag

```
mapState
languageList
```

Vuex
By default default language will be english
